

Day 01 Laying the foundation for furniro business Journey*

User Dashboard Features:-

1. **Inventory Tracking:** Monitor low stock and out-of-stock items.
2. **Order Management:** View and manage all your orders in one place.
3. **Claim Management:** Report missing or defective items for replacement or refund.

Shipment:-

I will integrate a shipping engine API into my furniture website to enhance order tracking. This integration will enable automated label generation, allowing users to seamlessly track their orders. To ensure efficient delivery management within Pakistan, I am considering partnering with reputable courier services, including Leopards, TCS, and others.

Payment Method:-

I want to make payments, easy and safe for our users. So, we're adding two payment options: Stripe and UBL Go Green.

Stripe will be our main payment method. It lets users pay with debit / credit cards and other ways.

Stripe is great because:

It works worldwide.

It keeps user information safe.

This will make payments simpler and more secure for our users.

Template Type Furniture:-

In our online furniture marketplace!
Our goal is to make furniture shopping easy and enjoyable.
With our e-commerce platform, you can:

Browse and buy furniture from the comfort of your own home select items that fit your style and preferences
Use Augmented Reality (AR) to visualize products in your own space.

With AR you can:

Click on a product, like a sofa select "View in AR" see how the product looks in your home environment.

Plus, we offer discounts for bulk purchases:

Buy multiple items in different quantities.
Get 10% to 15% off your total purchase

Shop with us and experience the convenience and fun of online furniture shopping.

Diagram:-

Inventory Management:-

Each product has a stock level managed through the inventory system.
When a product's stock level runs low, an alert is triggered.

Order Management:-

Each order consists of one or more products.

Customers can track their orders and receive updates on their purchase.

Shipment Management:-

Each shipment is linked to a specific order. Order #46, for example, has a delivery status of 'In Transit'.

Shipment Tracking:-

Track the status of your shipment in real-time.

Delivery Zones:-

We divide our delivery areas into specific zones.

Examples of delivery zones:

Madachi.

Shose Cantonment.

Three designated areas.
